

Macro - N

A. Not compatible Subjects names

1. The previous macro should have update the Subjects' names in Main sheet & in Normalize sheet to be identical.
2. We found out during the QC that the Subjects' & sub-Subjects' names are not fully identical.
3. The macro must fix this issue.

B. Data Validation cells

1. Cells with "0=x / 5=p" aside are data validate (Data>Data Validation>List – 0/5), have aside the left side when the cursor is on the cell:

2. During the QC we found out that after running the macro, many of the cells lost their definition.
3. Fixing the issue is by running a fixing macro that copy a defined cell & paste it in all the broken cells in Main sheet.

C. The "רמת שירות וממשקים" Subject

1. In most of our 4,248 Excells, the layer exact name "רמת שירות וממשקים" is included, mainly as Subject # 2 or 3, as following seen.
2. In the attached **Excel #1**, a sample of the layer inclusion (correctly).
3. The rows & columns of the Subject aren't important since the formula does the job.
4. The text is included in Main sheet & in Normalize sheet, the two are linked by the formula, where:
 - a. The formula points the column of numerical data in Main sheet (in this sample – in column I).
 - b. The columns referred to in Normalized sheet (in this sample – columns H & j [the mid column I isn't important, but should stay]).
 - c. The rows in Main & Normalize sheets are pointed by the formula.
5. We found out that in some of the cases, the inclusion of the Subject is different & more rows, or the formula is broken or no formula at all.

The formula

$$= (IF(I5=Normalize!H6,5,IF(I6<Normalize!H6,5,IF(I6>Normalize!J6,0,5-((I6-Normalize!H6)/(Normalize!J6-Normalize!H6))^5)))+$$

$$IF(I8=Normalize!H8,5,IF(I8<Normalize!H8,5,IF(I8>Normalize!J8,0,5-((I8-Normalize!H8)/(Normalize!J8-Normalize!H8))^5))+$$

$$IF(I9=Normalize!H9,5,IF(I9<Normalize!H9,5,IF(I9>Normalize!J9,0,5-((I9-Normalize!H9)/(Normalize!J9-Normalize!H9))^5))+I10)/4$$

Main sheet

[illegible]

Normalize sheet

K	J	I	H	G	F	E	D	C	B	A
	MAX	AVR	MIN							

5.0	5.0	5.0
-----	-----	-----

4.0	4.0	4.0
9.0	9.0	9.0

רמת שירות וממשקים

זמן תגובה לפניות בצורך קשר /תמיכה של האתר (שעות)

זמן המתנה ממוצע למענה טלפוני של המוקד

2.1 בשעות הפעילות (דקות)

2.2 מעבר לשעות הפעילות (דקות)

3

1

2

- Correct the Subject texts in both sheets if needed.
- If an extra row – delete the bellow row.
- Put the formula with all the right references (rows, columns), & make sure that all is correct.

1. In most of the Excels, the formula is this type as in **Excel #2**, cell **H114** (referring to **H118**):
 "IF(**H118**=1948,5,IF(**H118**<1948,5,IF(**H118**>YEAR(TODAY()),0,5-((**H118**-1948)/(YEAR(TODAY())-1948))*5)))" or close to that (wrong).

	I	H	G	F	E	D	C	B	A
2	מחיר ואזורי שליחיות (במחוז העדר פעילות מלאה /חלקית המחיר=999)								46
	150 ₪	150 ₪	150 ₪	צפון	1.1				47
	66 ₪	66 ₪	66 ₪	חופה והקורות	1.2				48
	225 ₪	225 ₪	225 ₪	שרון	1.3				49
	125 ₪	125 ₪	125 ₪	מרכז	1.4				51
	100 ₪	100 ₪	100 ₪	גוש-דן	1.5				52
	100 ₪	100 ₪	100 ₪	ירושלים	1.6				53
	100 ₪	100 ₪	100 ₪	אי"ש	1.7				54
	125 ₪	125 ₪	125 ₪	שפלה	1.8				55
	55 ₪	55 ₪	55 ₪	דחם	1.9				56
	225 ₪	225 ₪	225 ₪	אלת	1.10				57

b. 11 texts rows, as in **Excel #4**:

1) In cell **I54** is the formula that if all is correct - must show **5.0**. The formula should be:

The formula

```
=(IF(I55=Normalize!G28,5,IF(I55<Normalize!G28,5,IF(I55>Normalize!G28,0,5-((I55-Normalize!G28)/(Normalize!G28-Normalize!G28))*5)))+
IF(I56=Normalize!G29,5,IF(I56<Normalize!G29,5,IF(I56>Normalize!G29,0,5-((I56-Normalize!G29)/(Normalize!G29-Normalize!G29))*5)))+
IF(I57=Normalize!G30,5,IF(I57<Normalize!G30,5,IF(I57>Normalize!G30,0,5-((I57-Normalize!G30)/(Normalize!G30-Normalize!G30))*5)))+
IF(I58=Normalize!G31,5,IF(I58<Normalize!G31,5,IF(I58>Normalize!G31,0,5-((I58-Normalize!G31)/(Normalize!G31-Normalize!G31))*5)))+
IF(I59=Normalize!G32,5,IF(I59<Normalize!G32,5,IF(I59>Normalize!G32,0,5-((I59-Normalize!G32)/(Normalize!G32-Normalize!G32))*5)))+
IF(I60=Normalize!G33,5,IF(I60<Normalize!G33,5,IF(I60>Normalize!G33,0,5-((I60-Normalize!G33)/(Normalize!G33-Normalize!G33))*5)))+
IF(I61=Normalize!G34,5,IF(I61<Normalize!G34,5,IF(I61>Normalize!G34,0,5-((I61-Normalize!G34)/(Normalize!G34-Normalize!G34))*5)))+
IF(I62=Normalize!G35,5,IF(I62<Normalize!G35,5,IF(I62>Normalize!G35,0,5-((I62-Normalize!G35)/(Normalize!G35-Normalize!G35))*5)))+
IF(I63=Normalize!G36,5,IF(I63<Normalize!G36,5,IF(I63>Normalize!G36,0,5-((I63-Normalize!G36)/(Normalize!G36-Normalize!G36))*5)))+
IF(I64=Normalize!G37,5,IF(I64<Normalize!G37,5,IF(I64>Normalize!G37,0,5-((I64-Normalize!G37)/(Normalize!G37-Normalize!G37))*5)))+
IF(I65=Normalize!G38,5,IF(I65<Normalize!G38,5,IF(I65>Normalize!G38,0,5-((I65-Normalize!G38)/(Normalize!G38-Normalize!G38))*5)))/11
```

2) The 11 texts in rows 55-65 of column D must be identical in Main & Normalize sheets.

3) The 11 values in Main must be identical to those in columns **I** & **G** of Normalize, & aside the values in Main must be **NV**.

4) There must be full synchronization of the rows in Main & Normalize values as defined in the formula.

5) The 2 yellow columns in the left must be synchronizes with the texts rows.

Main sheet

I	H	G	F	E	D	C	B	A
5.0							2	53
35	NV							54
125	NV							55
66	NV							56
200	NV							57
90	NV							58
50	NV							59
40	NV							60
45	NV							61
30	NV							62
35	NV							63
200	NV							64
								65
								66

Normalize sheet

I	H	G	F	E	D	C	B	A
							2	26
35	35	35						27
125	125	125						28
66	66	66						29
200	200	200						30
90	90	90						31
50	50	50						32
40	40	40						33
45	45	45						34
30	30	30						35
35	35	35						36
200	200	200						37
								38

3. During the QC we found many errors in this module: texts, formulas, synchronization of the formula rows/columns to Main and/or Normalize sheets, missing formulas...

4. Corrections needed:

- Texts of the 2 types.
- Formulas of the 2 types.
- Synchronization of rows & columns.

G. Closing the Excels

After running code #4, before closing the Excels, bring the cursers in all the sheets to cell **A1**
